2. Project Overview
3. End Users
4. Tools and Technologies
5. Portfolio design and Layout
6. Features and Functionality
7. Results and Screenshots
8. Conclusion
9. Github Link

PROBLEM STATEMENT

■

As a fresher, I need a portfolio website to showcase my skills, education, and achievements in a clear and professional way. This will help me stand out to recruiters and create a strong online present

PROJECT OVERVIEW

This portfolio website is created to showcase my skills, education, certifications, and projects. It is built with HTML, CSS, and JavaScript to make it simple, responsive, and user-friendly. The website acts as my online resume and helps me present myself professionally to recruiters and others.

WHO ARE THE END USERS?

- 
1. Recruiters and Hiring Managers – to quickly evaluate the candidate's skills, qualifications, and projects.
 2. Academic Institutions/Faculty – to review the student's achievements and projects for academic purposes.
 3. Peers and Professionals – to collaborate, share knowledge, and connect professionally.
 4. The Portfolio Owner (Self) – to build an online presence, showcase skills, and continuously update personal and professional growth.
- 

TOOLS AND TECHNIQUES

1. HTML5 – For structuring the content and layout of the portfolio website.
2. CSS3 – For designing, styling, and creating a responsive, visually appealing interface.
3. JavaScript – For adding interactivity, smooth transitions, and dynamic behavior.
4. Visual Studio Code (VS Code) – As the code editor for development.

POTFOLIO DESIGN AND LAYOUT

My portfolio is designed with a simple and clean layout. It includes sections like Home, About Me, Skills, Projects, and Contact. The design is responsive so it looks good on both computers and mobile devices.

FEATURES AND FUNCTIONALITY

Responsive design (works on mobile and desktop)

Easy navigation with menu

Home, About, Skills, Projects, and Contact sections

Smooth scrolling and animations

Hosted online for easy access

RESULTS AND SCREENSHOTS
